Objective

Software Engineering student with experience building full-stack web applications and REST APIs using React, TypeScript, Node.js, and MongoDB. Built applications involving authentication, role-based access control, and multi-user workflows while maintaining a strong focus on Data Structures, Algorithms, DBMS, and backend development.

Education

Dy Patil College of Engineering (SPPU), Pune *Aug 2023 – July 2027*
Bachelor of Engineering in Information Technology

- CGPA: 9.52 / 10

Data Structures & Algorithms

- **Knight** on Leetcode(Max Rating: 2092) LeetCode
- **Pupil** on codeforces(Max Rating: 1278) Codeforces
- Solved **800+** Data Structures and Algorithms problems across LeetCode and Codeforces

Projects

yourVoice — Anonymous Feedback and Communication Platform *GitHub — Live*

- Developed a full-stack anonymous communication platform for students, staff, and administrators.
- Designed RESTful APIs for authentication, query management, and role-specific workflows.
- Implemented JWT-based authentication and role-based access control (RBAC) across multiple user roles.
- Built backend authorization workflows and protected frontend routes for secure application access.
- Added admin moderation and audit logging features for system management and accountability.
- Deployed the application using Vercel (frontend) and Render (backend).
- **Tech:** React, TypeScript, Framer Motion, Node.js, Express.js, MongoDB

DevMate — SaaS-Style Project Management System *GitHub — Live*

- Developed a full-stack project management platform for Clients, Projects, Tasks, Invoices, and Notes.
- Designed RESTful APIs with JWT-based authentication and secure user-specific data access.
- Followed a TypeScript-first architecture to improve maintainability, reliability, and long-term scalability.
- Implemented consistent API error handling, loading states, and form validation to improve application reliability and user experience.
- Deployed using Vercel and Render.
- **Tech:** React, TypeScript , Framer Motion, Node.js, Express.js, MongoDB

Technologies

Programming Languages: C++, Java, JavaScript, TypeScript
Frontend Technologies: React.js, Tailwind CSS
Backend Technologies: Node.js, Express.js, REST APIs, JWT Authentication
Databases: MongoDB, Mongoose, MySQL (Basics)
Tools & Development Practices: Git, GitHub, Postman,Vercel, Render
Core Computer Science: Data Structures Algorithms, DBMS, Operating Systems, OOP
