## Objective

---

Frontend / Full-Stack Developer with strong fundamentals in React, TypeScript, and backend development using Node.js and MongoDB. Experienced in designing and building complete web applications with authentication, role-based access control, and clean API architecture through academic and personal projects.

## Education

---

**Savitribai Phule Pune University (SPPU), Pune**

*Aug 2023 – July 2027*

*B.E. in Information Technology*

- CGPA: 9.67 / 10

## Data Structures & Algorithms

---

- **Knight** on Leetcode(1961 rated) [LeetCode](#) 🔗
- **Pupil** on codeforces(1275 rated) [Codeforces](#) 🔗
- **650+** DSA problems

## Projects

---

**yourVoice — Anonymous Feedback and Communication Platform**

[GitHub](#) 🔗 — [Live](#) 🔗

- Designed and built an anonymous communication platform enabling users to share concerns without identity exposure.
- Implemented authentication and role-based access control for students, staff, and admins.
- Secured the application using protected frontend routes and backend authorization checks.
- Built admin-facing features for user management and content moderation.
- Added audit logging to track important system actions for accountability.
- Deployed the application using Vercel (frontend) and Render (backend).
- **Tech:** React, TypeScript, Node.js, Express, MongoDB

**DevMate — SaaS-Style Project Management System (In Development)**

[GitHub](#) 🔗

- Actively designing and developing a SaaS-style application to manage Clients, Projects, Tasks, and Invoices.
- Following a TypeScript-first architecture across frontend and backend to improve reliability and long-term maintainability.
- Focusing on frontend engineering best practices, including clean component structure, predictable loading states, and empty states.
- Gradually migrating an existing JavaScript codebase to TypeScript as part of the development process.
- **Tech:** React, TypeScript, Node.js, Express, MongoDB

## Technologies

---

**Programming Languages:** C++ (proficient), JavaScript, TypeScript, Java, Go (basic syntax)

**Frontend:** React, TypeScript, JavaScript (ES6+)

**Backend:** Node.js, Express, REST API design, Authentication, Role-Based Access Control (RBAC)

**Database:** MongoDB, Mongoose (schema design)

**Development Practices & Tools:** Git, TypeScript-first development, API error handling, basic deployment workflows (Vercel, Render)

**CS Fundamentals:** Data Structures & Algorithms(Strongest part), Object-Oriented Programming, Basic OS
